

Location: Field - Devon

NEP Canada ULC is a private oil and gas company applying new drilling and completions technologies to proven producing oil fields in the Western Canadian Sedimentary Basin

Production Operator – Devon Alberta

NEP Canada ULC has an opportunity for a Field/Plant Operator. This position is based in the Leduc/Devon AB area, reporting to the Lead Operator. The Plant/Field Operator will operate, monitor, and test oil/gas wells as per NEP Canada's requirements. Additional responsibilities will also include monitoring and inspecting assigned facilities, optimizing and troubleshooting daily production, and participating in an on call rotation. Candidates must live within 30 min of Leduc/Devon, have 5+ years of relevant industry experience, formal operational and safety training as follows: Solis/CMDS, First Aid/CPR, H2S Alive, WHMIS, and a commitment to safety.

Key Responsibilities

- Operate and monitor oil facilities, gas processing equipment and associated wells.
- Strive to maximize production and safety while satisfying Company and Regulatory Policies.
- Testing of oil, gas and water production on a daily basis.
- Strive to minimize well and facility downtime.
- Facilitate daily production and downtime reports. Work with shift partner to complete monthly run tasks, required pigging/batching, and applicable documentation.
- Participate in an on call rotation.

Essential Experience & Skills

- Candidates must live within 30 min of Leduc/Devon area,
- 5+ years of relevant industry experience with preference towards oil operations, specifically sour oil wells, satellites, and batteries.
- Formal operational and safety training including: Solis/CMDS, First Aid/CPR, H2S Alive, WHMIS
- Proven commitment to safety.
